We are proud to present our latest catalogue. This publication now comes in four sections: yes, something a little different. Authentage itself has also changed. Let's take you through the new layout:

Part 1 was designed to inspire you, to experience the Authentage "look and feel".
Part 2 is the actual catalogue, with product information on each application.
Part 3 is the price list and is structured like the catalogue.
Part 4 is the bulb file where you'll find a clear overview of the available light sources, together with our own suggestions.

Met trots stellen we je onze nieuwe catalogus voor die voortaan uit vier delen zal bestaan. Juist, net een tikkeltje anders, want Authentage is nu ook anders. We nemen je mee door ons opzet:

Deel 1 heeft als doel je te inspireren, hier kan je de 'look and feel' van Authentage ervaren.
Deel 2 is de eigenlijke catalogus waarin je per toepassing productinfo kan terugvinden.
Deel 3 is de prijslijst die dezelfde structuur aanhoudt als de catalogus.
Deel 4 is de lampenfiche waarin we je voor elk product een helder overzicht geven van de beschikbare lichtbronnen, plus onze suggestie.

Nous sommes fiers de vous présenter notre nouveau catalogue qui se divise en quatre parties à partir de maintenant. Pour apporter ce petit truc qui fait la différence. Authentage a également fait peau neuve. Voici quelques mots d'explication concernant cette nouvelle mise en page:

La Partie 1 vise à vous inspirer et à vous faire découvrir le « look and feel » de notre marque.
La Partie 2 reprend notre catalogue avec des informations produit par application.
La Partie 3 est notre liste de prix qui présente une structure identique à celle du catalogue.
La Partie 4 reprend la fiche de lampes. Nous vous présentons un récapitulatif clair des sources lumineuses disponibles pour chaque produit ainsi que nos suggestions.

Mit Stolz präsentieren wir Ihnen unseren neuen Katalog. Dieser besteht ab sofort aus vier verschiedenen Teilen. Denn Authentage hat sich verändert und so ist auch der Aufbau etwas anders als gewohnt:
Teil 1 soll Inspirationen liefern. Hier erhalten Sie einen Eindruck vom „Look and Feel" von Authentage.
Teil 2 bildet den eigentlichen Katalog mit Produktinformationen zu allen Modellen.
Teil 3 ist die Preisliste. Sie folgt in der Struktur dem Katalog.
Teil 4 besteht aus den Datenblättern zu den Lampen. Sie bieten jeweils einen Überblick über die möglichen Lichtquellen und enthalten unsere Empfehlung.

PICTOGRAMS

We have placed pictograms alongside the products in the catalogue. The pictogram legend features on page 494.

In onze catalogus hebben we verschillende pictogrammen bij de producten aangebracht. De legende voor deze pictogrammen vind je op pagina 494.

History

AUTHENTAGE: AUTHENTICITY IN LIGHTING

Since the company's foundation in 2006, Authentage has become an established name in the lighting market.

From simple beginnings (our first indoor spotlights were put together in an attic room), Authentage has become synonymous with an extensive collection of lighting products for both indoor and outdoor use, assembled with passion and craftsmanship at our current production site near Antwerp.

Sinds haar oprichting in 2006 groeide Authentage uit tot een vaste waarde op de verlichtingsmarkt.
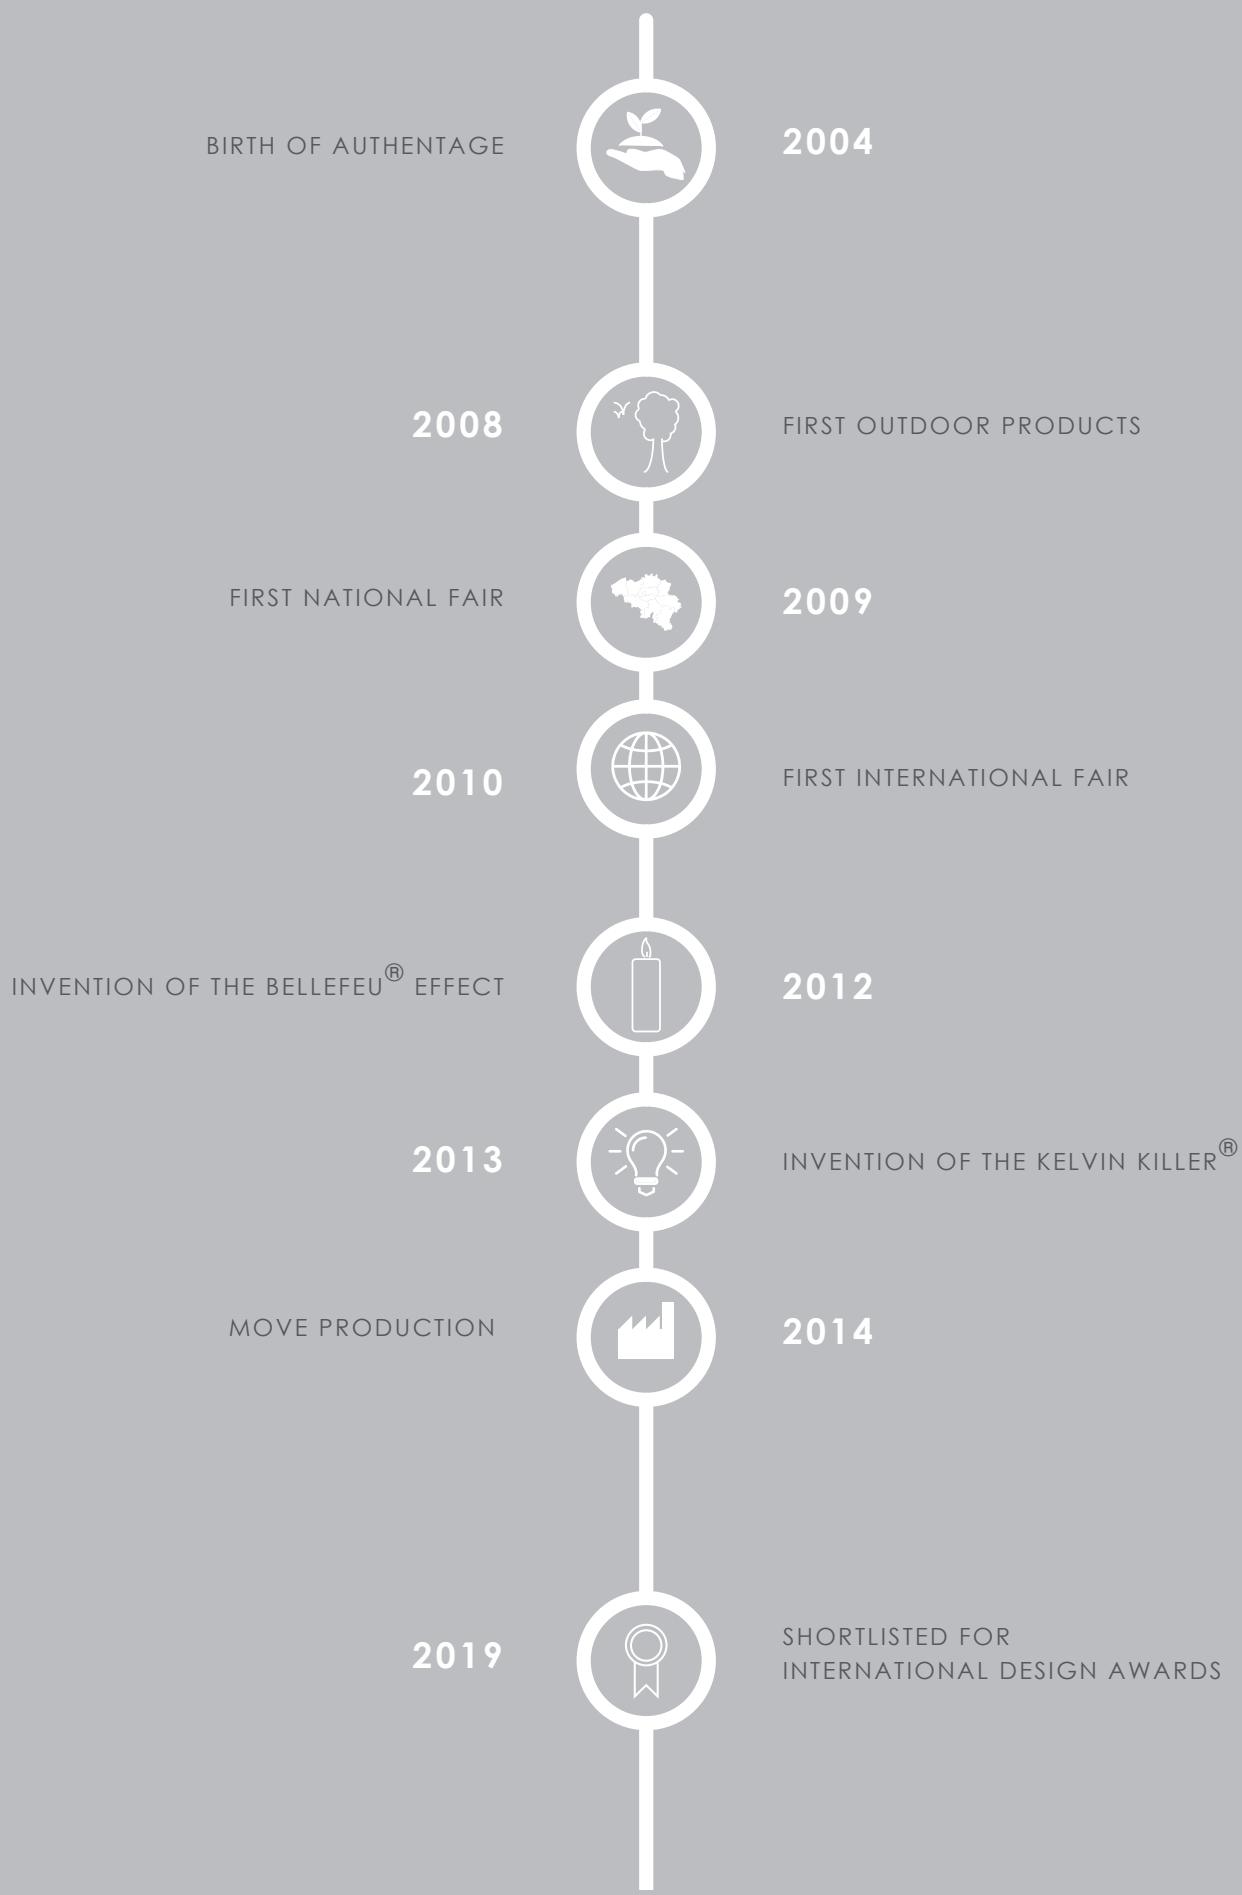

Wat begon op een zolder met de productie van de eerste indoorspots is in de daaropvolgende jaren uitgegroeid tot een uitgebreide collectie van zowel indoor- als outdoorproducten. Deze worden met veel passie voor het vak geassembleerd in onze huidige productielocatie nabij Antwerpen.

Depuis sa fondation en 2006, Authentage a évolué pour devenir une valeur sûre sur le marché de l'éclairage.

Cette belle aventure qui a commencé par la production des premiers spots intérieurs dans un grenier s'est transformée au fil des années en une vaste collection de produits d'intérieur et d'extérieur. Animés d'une vive passion, nous assemblons tous nos produits sur notre site de production actuel situé à deux pas d'Anvers.

Seit der Unternehmensgründung im Jahr 2006 hat Authentage sich zu einer festen Größe im Beleuchtungsmarkt entwickelt.

Was mit den ersten Indoor-Spots – hergestellt auf einem Dachboden – begann, ist in den Folgejahren zu einer umfangreichen Kollektion mit Innen- und Außenlampen geworden. Sie alle werden mit viel Liebe zum Fach in unserem heutigen Werk unweit von Antwerpen gefertigt.

Material & Finish

To allow us to supply you with products of the highest quality we exclusively use high-grade raw materials, primarily brass. Brass is closely related to bronze and shares its same great properties. The material is resistant to the most extreme weather conditions and is corrosion-free, making it ideal for applications both indoors and out.

The standard finishes you'll find in our catalogue include bronze, brushed nickel, chrome and polished brass (with a golden sheen) but we are equally happy to execute your light fittings in other finishes like polished nickel or brushed brass. Don't hesitate to contact us to discuss the options.

Om de topkwaliteit van onze producten te garanderen, gebruiken we uitsluitend grondstoffen van zeer hoogwaardige kwaliteit. Zo werken we hoofdzakelijk met messing. Messing is nauw verwant aan brons en heeft dezelfde positieve eigenschappen. Het materiaal is zeer resistent tegen de meest extreme weersomstandigheden en is corrosievrij. Daardoor is het uitermate geschikt voor zowel binnen- als buitentoepassingen.

De standaardafwerkingen die je terugvindt in onze catalogus zijn brons, geborsteld nikkel, chroom & gepolierd messing (goudkleurige schijn). We hebben echter ook ervaring met andere afwerkingsmethodes zoals gepolierd nikkel of geborsteld messing. Heb je vragen? Stel ze ons gerust.
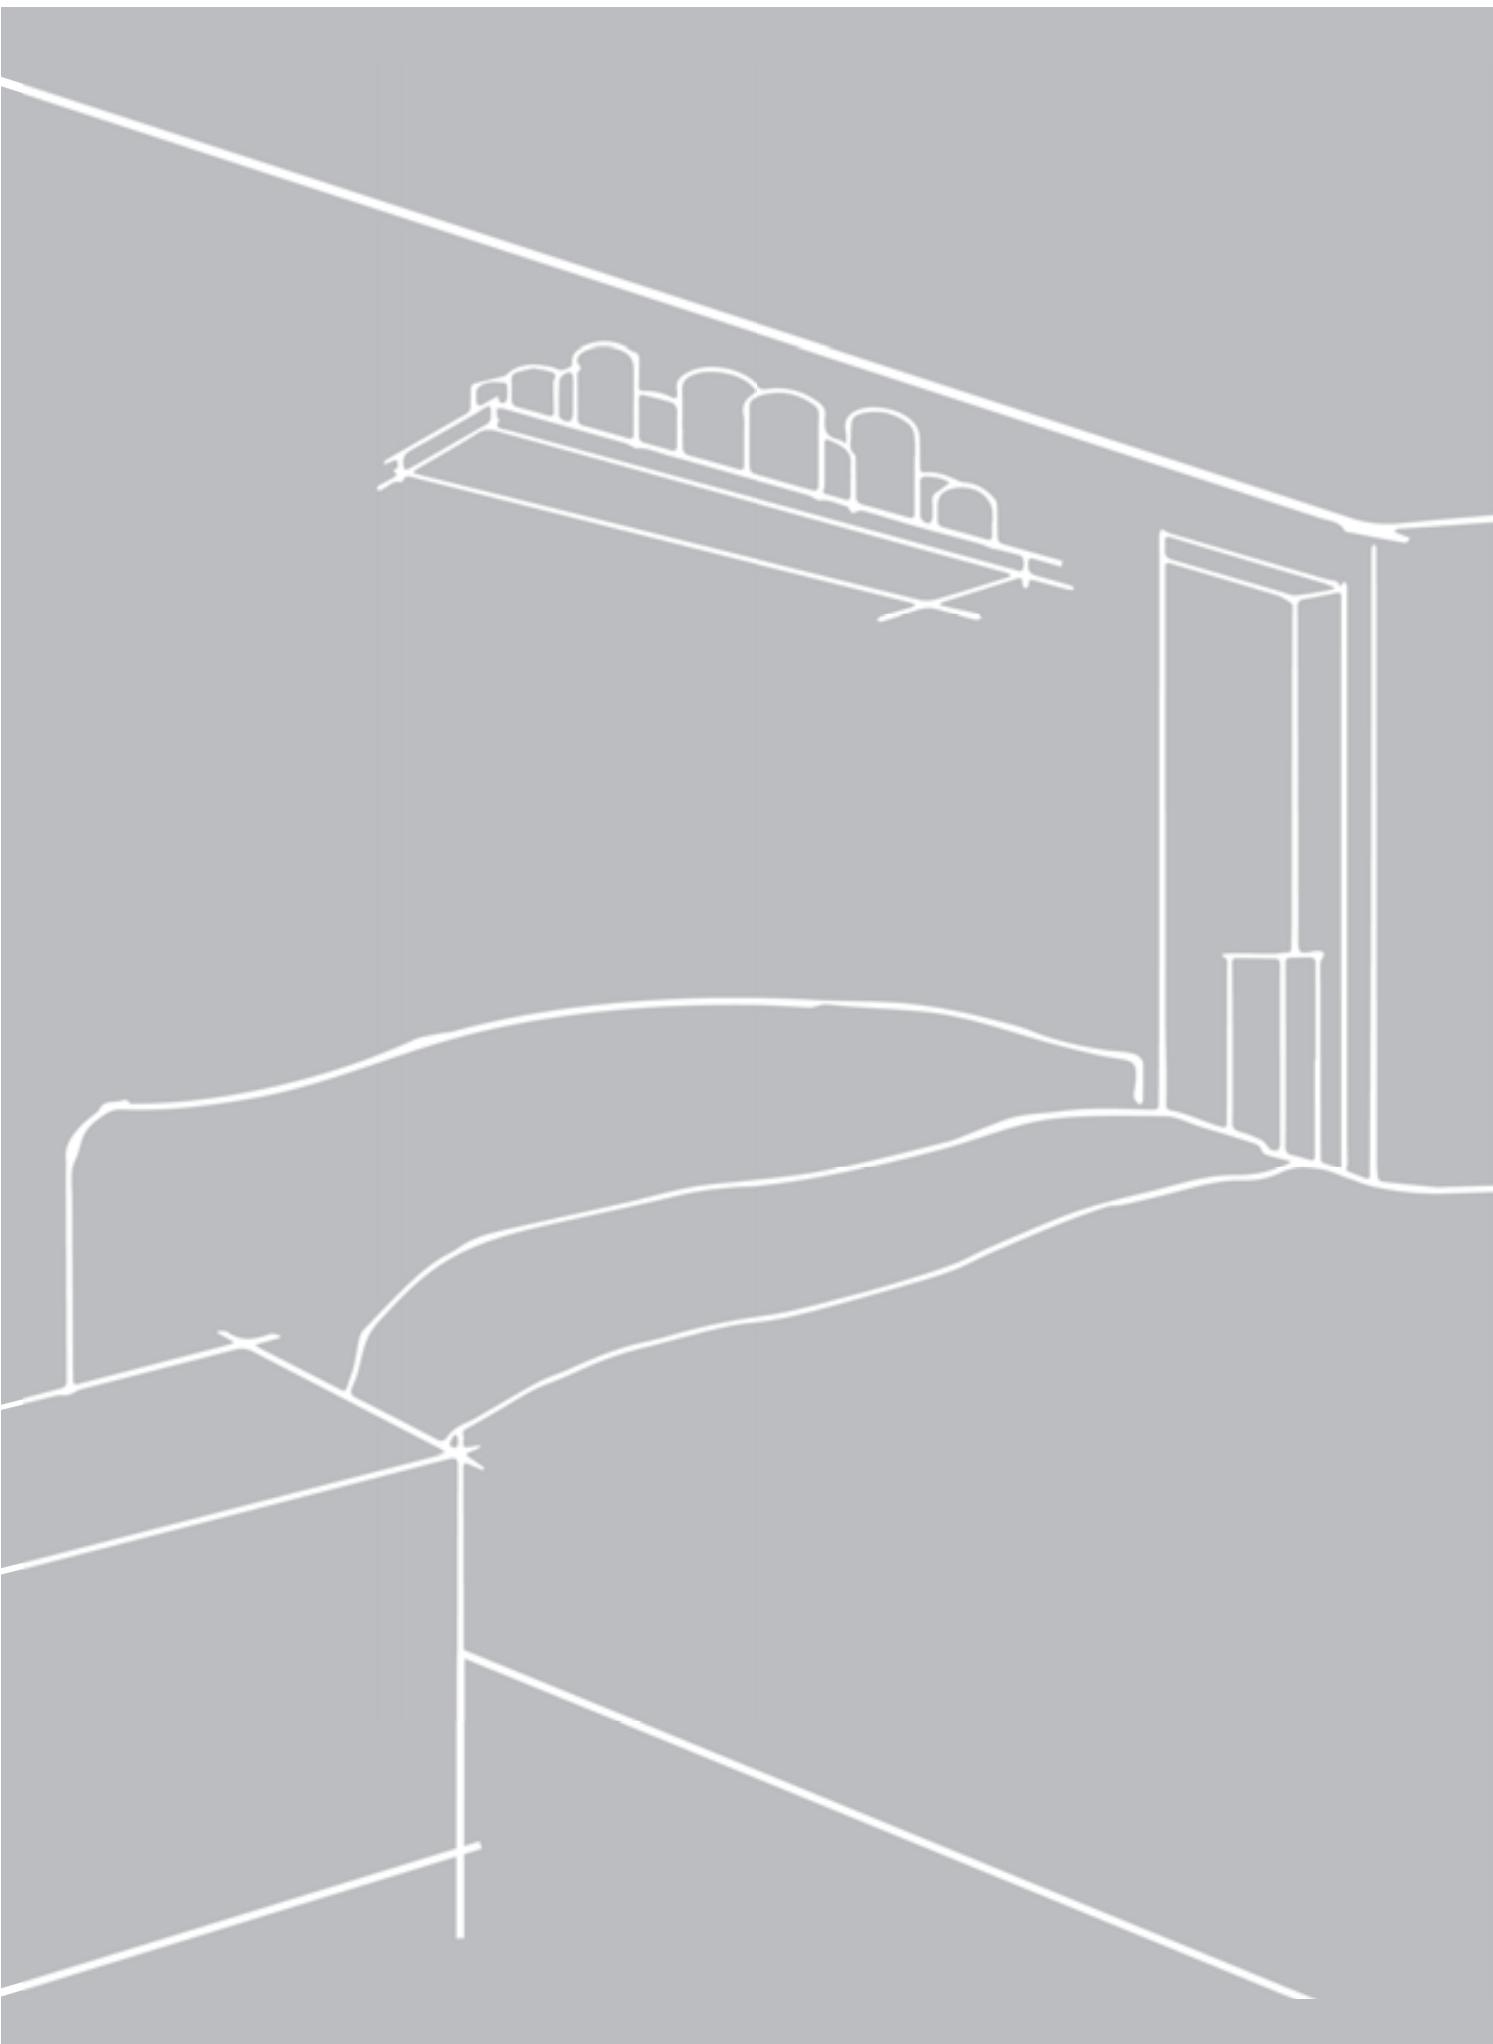

Nous utilisons exclusivement des matières premières de très grande qualité afin de proposer des produits hautement qualitatifs. Il s'agit principalement de laiton. Le laiton, proche parent du bronze, présente les mêmes propriétés intéressantes. Ce matériau résiste particulièrement bien aux conditions climatiques extrêmes ainsi qu'à la corrosion. Il convient dès lors à merveille aux applications intérieures comme extérieures.

Les finitions standard que nous vous proposons dans notre catalogue sont le bronze, le nickel brossé, le chrome et le laiton poli (apparence dorée). Toutefois, nous avons déjà travaillé avec d'autres méthodes de finition telles que le nickel poli ou le laiton brossé. N'hésitez pas à nous contacter pour toute question à ce sujet.

Damit wir die hohe Qualität unserer Produkte gewährleisten können, verwenden wir ausschließlich hochwertige Werkstoffe, vor allem Messing. Messing hat große Ähnlichkeiten mit Bronze und weist die gleichen positiven Eigenschaften auf. Es widersteht selbst den widrigsten Wetterbedingungen und ist korrosionsfrei. Deshalb ist es für drinnen und draußen gleichermaßen gut geeignet.

Unsere Standardausführungen im Katalog sind aus Bronze, gebürstetem Nickel, Chrom und poliertem Messing (goldfarbener Schimmer) gefertigt. Aber auch andere Varianten, z. B. aus poliertem Nickel oder aus gebürstetem Messing, sind möglich. Bei Fragen dazu beraten wir Sie gern.

Een uitgekiende collectie die zichzelf niet centraal stelt, maar ten dienste staat van de kunstwerken die alle aandacht verdienen. Dankzij de aanpasbare lengte, vorm en lichtintensiteit zorgen we ervoor dat je pronkstukken optimaal kunnen schitteren.

À l'instar des grands maîtres dont ils tirent leur nom, ces luminaires respirent un perfectionnisme obstiné. Une collection bien étudiée qui, loin de s'imposer, se met au service des œuvres d'art qui méritent toute l'attention. Grâce à leur longueur, leur forme et leur intensité lumineuse réglables, ces luminaires permettent de mettre vos pièces maîtresses en lumière de manière optimale.

Genau wie die Meister, nach denen sie benannt sind, strahlen diese Lampen einen eigenwilligen Perfektionismus aus. Die sorgsam zusammengestellte Kollektion drängt sich nie in den Vordergrund, sondern unterstreicht stets die Objekte, auf die sie die Aufmerksamkeit lenken. Dank der einstellbaren Länge, Form und Lichtstärke kommen Ihre Prunkstücke jederzeit optimal zur Geltung.

Barron & Filou

Our Barron fittings exemplify lighting in its purest form. A simple though finely detailed design that creates an authentic yet hi-tech look. The closely clustered bulbs provide a diffuse and warm ambient light. The same simplicity typifies the various styles in our Filou collection which can be fitted all around the home.

De Barron-armaturen staan voor verlichting in haar zuiverste vorm. Een eenvoudig ontwerp voorzien van fijne details, met een tegelijk technische en authentieke uitstraling als resultaat. De dicht bij elkaar geplaatste lampjes verspreiden een diffuus en warm omgevingslicht. Dezelfde eenvoud kenmerkt ook de Filou-collectie, die in haar verschillende modellen zeer breed toepasbaar is doorheen je hele interieur.
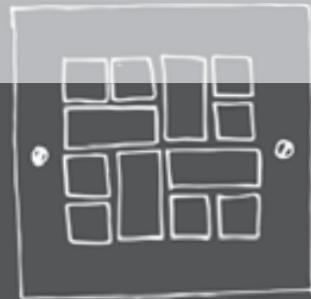

Les armatures Barron représentent l'éclairage dans sa forme la plus pure. Le résultat ? Une conception simple dotée de détails délicats associée à un éclairage authentique et technique. Les lampes très rapprochées propagent une lumière d'ambiance chaleureuse et diffuse. La collection Filou présente les mêmes caractéristiques. Elle se décline en différents modèles qui trouveront assurément une place dans votre intérieur.

Die Barron-Modelle dagegen stehen für Beleuchtung in ihrer reinsten Form: Das einfache Design mit feinen Details besticht durch seinen technischen und zugleich authentischen Look. Die nah beieinanderstehenden Leuchten verteilen ein diffuses und warmes Umgebungslicht. Dieselbe Einfachheit findet sich auch in der Filou-Linie, deren Modelle sich für fast jeden Zweck und jedes Interieur eignen.

Grille & Beautique

The Grille and Beautique collections are designed for recessed wall installation and are ideal for orientation or night-time lighting on a staircase, in a dressing room or even in a walk-in shower. Lovers of sleek design will opt for the Grille range while those who favour the maritime touch will be smitten by the Beautique range. The surface-mounted version of the Beautique will take you back to the steamship era and, in combination with the deeply recessed light source, will create a striking atmosphere.

De collecties Grille en Beautique zijn speciaal ontworpen voor wandinbouw, ideaal als oriëntatie- of nachtverlichting langs een trap, in een dressing of zelfs in een inloopdouche. Kies voor de Grill-serie als je van een strakker design houdt of voor de Beautique-serie als je een maritieme toets aan je interieur wil geven. Het ontwerp van de opbouwversie van de Beautique verwijst naar stoomschepen en schept, in combinatie met de dieperliggende verlichting, een bijzondere sfeer.

Les collections Grille et Beautique ont été spécialement conçues pour être intégrées dans le mur. Ces modèles conviennent parfaitement comme lampe d'orientation ou éclairage nocturne dans un escalier, dans un dressing ou même dans une douche à l'italienne. Si vous aimez un design sobre, optez pour la série Grill. Quant à la collection Beautique, elle apportera une touche maritime à votre intérieur. La conception de la version sur pied du modèle Beautique fait référence aux bateaux à vapeur et offre un éclairage indirect profond dans une ambiance particulière.

Die Linien Grille und Beautique für den Wandeinbau bieten ideale Nacht- oder Orientierungslampen für Treppen, Ankleideräume oder auch Duschen. Während die Grille-Modelle durch ihr schlichtes Design bestechen, ist Beautique besonders bei Liebhabern von maritimem Flair beliebt. Bei der Aufbauvariante von Beautique ist das Design an alte Dampfschiffe angelehnt. In Verbindung mit der tief liegenden Lichtquelle entsteht so eine einzigartige Stimmung.

Galed

The Galed series combines a stunning round design with a recessed, warm LED light. Its remarkable design ensures a minimum of dazzle and a maximum of visible oblique light, ideal for discrete ground or path lighting. By playing around with lighting on one side, two sides or at 360°, the sky is the limit when it comes to creating atmosphere in your garden. Also available as Galed Pole: an hourglass-shaped pole with integrated LEDs.

De Galed-reeks staat voor een fraaie combinatie van een afgerond design met een diepgelegen warm LED-licht. Deze bijzondere vormgeving resulteert in een minimum aan verblinding en een maximum aan zichtbaar scheerlicht, ideaal als discrete grond- of padverlichting. Door te spelen met verlichting langs één zijde, twee zijdes of 360° kan je een andere sfeer creëren in je tuin. Ook verkrijgbaar als Galed Pole, een zandlopervormig paaltje waarin de LED's verwerkt werden.

La collection Galed représente une jolie combinaison alliant design arrondi et une profonde lumière LED chaleureuse. Cette forme particulière n'éblouit pas et génère un maximum de lumière rasante visible. Cette série convient donc comme lumière de sol discrète pour éclaire votre allée par exemple. Créez des ambiances différentes dans votre jardin en jouant avec un éclairage d'un seul côté, des deux côtés ou à 360°. Cette collection est également disponible en version Galed Pole, un pied en forme de sablier dans lequel sont intégrées les lampes LED.

Die Galed-Linie kombiniert raffiniertes Design mit einem warmen LED-Licht aus der Tiefe. Diese besondere Formgebung reduziert die Blendwirkung auf ein Minimum und sorgt für ein Höchstmaß an sichtbarem Streiflicht. Die Lampen sind deshalb ideal als diskrete Boden- oder Wegbeleuchtung. Je nachdem, ob sie auf einer Seite, auf zwei Seiten oder rundum zum Einsatz kommen, entsteht eine andere Stimmung im Garten. Ebenfalls erhältlich die Ausführung Galed Pole. Dabei sind die LEDs in sanduhrförmige Pfähle integriert.

Phantôme & Aureole

With their paintable, heat-resistant recessed mounting boxes, the Phantôme recessed spotlights can be seamlessly incorporated into any ceiling. Combined with a built-in LED reflector, they allow you to effortlessly switch between a functional spotlight, soft, indirect, atmosphere lighting or a combination of the two.

Modularly designed, the Aureole is an easy-to-install multifunctional recessed spotlight. A basic design with extensive options: from a narrow directional, anti-dazzle beam to a wider, warmer glow. This spotlight is quick and easy to mount on a range of materials from concrete to plasterboard.

De 'Phantôme'-inbouwspots kunnen dankzij de overschilderbare en hittebestendige inbouwboxen waarin ze worden gemonteerd, randloos worden ingewerkt in je plafond. Naar keuze combineer je deze spots met een ingebouwde LED-reflector, zodat je moeiteloos switcht tussen functioneel spotlicht, zachte indirecte sfeerverlichting of een combinatie van beide.

De Aureole is een multifunctionele en makkelijk te plaatsen inbouwspot, die volledig modulair is opgebouwd. Een basisontwerp met uitgebreide opties, gaande van een kleine gerichte en antiverblindende stralenbundel tot een bredere en warme gloed. Bovendien is deze spot snel en eenvoudig te monteren op verschillende materialen zoals beton en gipsplaat.

Les spots intégrés Phantôme peuvent être intégrés sans bords dans votre plafond grâce à leur boîtier d'encastrement à peindre et résistant à la chaleur. Vous combinez ces spots au gré de vos envies avec un réflecteur LED intégré afin de passer sans problème d'une fonctionnelle de spot à un éclairage d'ambiance indirect et doux ou encore à une combinaison des deux. L'Aureole est un spot encastré multifonction facile à placer conçu de manière à être totalement modulaire. Une conception élémentaire assortie d'un large éventail d'options allant d'un petit faisceau de lumière ciblée et antiéblouissante à un éclat plus intense et plus chaud. En outre, ce spot se monte facilement et rapidement sur différents matériaux comme du béton et des plaques de plâtre.

Die Einbauspots Phantôme lassen sich dank der überstreichbaren und hitzebeständigen Einbauboxen nahtlos in jede Decke integrieren. Auf Wunsch können sie auch mit einem eingebauten LED-Reflektor kombiniert werden und ermöglichen so problemlos einen Wechsel von funktionalem Spotlicht zu weichem, indirektem Stimmungslicht oder eine Kombination aus beiden.

Die multifunktionalen Aureole-Spots sind vollständig modular konzipierte Einbauspots. Zum Basiskonzept kommen vielfältige Optionen: von kleinen, gerichteten Antiblend-Spots bis hin zu einem warmen, sich ausbreitenden Glutlicht. Noch dazu lassen sich die Spots auf verschiedenen Materialien wie Beton und Gipsplatten problemlos montieren.

Select your driver with following steps

| STEP 1 | **SELECT TYPE OF DRIVER (12V OR 24V)** |

Collection	Type of driver
Centonze, Marron, Comète, Poire, Fleure, Fleure Twin, Fiston, Monet, Grille, Subtile, Charmond (retrofit), Macro	12V
Matisse, Pipilier, Beautique, Galed, Charmond (integrated), Eclips	24V

| STEP 2 | **CALCULATE TOTAL POWER CONSUMPTION OF THIS CIRCUIT** |

How many products (N) do you combine on 1 driver?

Total power consumption = N x power consumption of 1 product

| STEP 3 | **CALCULATE REQUIRED DRIVER CAPACITY** |

LED lamp: use maximum 50% of total nominal power of the driver

Halogen lamp: use 100% of total nominal power of the transformer

| STEP 4 | **LOCATION OF THE DRIVER / TRAFO** |

Indoor, outdoor or in the ground

EXAMPLE: Installation of 4 Centonze LED-spot with a bulb of 12W each in a living room

Step 1	Centonze requires 12V driver
Step 2	Total power consumption = 4(N) x 12W (power consumption of 1 product) = 48W
Step 3	LED lamp, only 50% of driver power can be used. Total required driver capacity is 2x48W=96W
Step 4	Indoor application (living room)
Result	Drivers TOETRAP10 (rectangular) or TOETRAR10 (round) can be used
